How to Use the 3D Flipbook

1. General Information

The file size of the 3D Flipbook with all its attachments will be about 70MB. Your book comes in a zipped folder for you to download after your purchase. In this folder, there will be a HTML file and three folders, called "javascript", "files", and "style". Do not worry about these folders. You will not have to do anything with them.

In addition, you will receive this information so that you can read it again in case you did not download it from the product page in the shop.

There will also be a PDF version of your book that you can read when you are offline.

2. Please Take the Following Steps

- create a folder on your hard drive in which you can save all the files after your purchase
- unzip the folder which contains your 3D Flipbook
- as soon as you have unzipped your folder, you can use your HTML file

3. Enjoy Reading Your 3D Flipbook

When you want to read your 3D Flipbook, double-click the HTML document. This will open your 3D Flipbook in a new window of your browser.

When you are offline, you still have the PDF file, which you can read in your PDF viewer.

In case you have any questions, you can find my contact details at the bottom of this document.

I wish you a pleasant read!
